Internship

Description

We firmly believe that an insight into the legal profession is essential for anyone wanting to embark on a legal career. We find that this is one of the best ways to make an informed assessment whether you will suit the Firm and whether the Firm will be suit you.

During this period, which usually lasts around two weeks, law students will gain the opportunity to shadow our lawyers from the various departments to get a broad overview what the legal profession entails including but not limited to undertaking research, working on banking documentation and attending court proceedings.
